

How to do a Lawn Sprinkler System

If a contractor/homeowner wants to put in a lawn sprinkler system, they need to fill out a plumbing permit.

Attached to the permit, they must have a drawing showing the number of heads and where they are located on the property.

The cost for a lawn sprinkler permit is \$30.00 PLUS \$4.00 per head (fixture). Don't forget the 1% OBC fee.

Make sure the contractor that is doing the work is registered to work in the City.

Once the Building Director has approved this application, then print out the permits.

FAX A COPY OF THE PERMIT TO THE WATER DEPARTMENT. (626-4032)

When the contractor/homeowner picks up the permit, be sure to give him a copy of the City of Streetsboro Backflow Prevention Program Form.

Let him know that this form must be filled out by a licensed plumber (our plumbing inspector is able to do this inspection), and then it must be turned in to the Water Department.
